

## An example of how to prepare a picture for the PDI competition

Make a folder to send the photo file to.

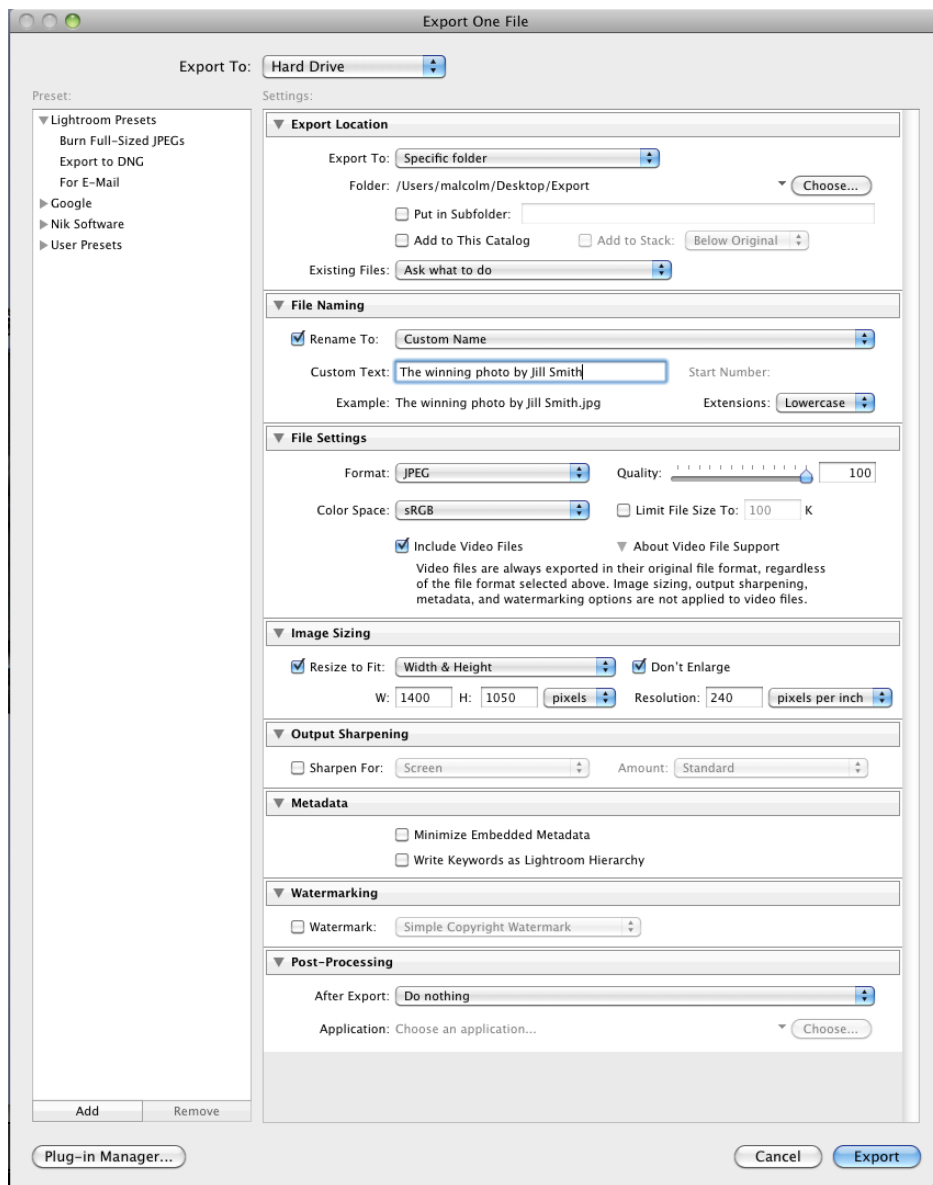

I made a folder called 'export' on my desktop so I can find it easily.

With Lightroom open click on the photo to select it.

Go to 'File' down to 'Export' (see picture)

This window will come up

Choose where the file should be put

Set 'custom name' and name the file

Use these settings

Tick 'Resize to Fit' and put in 1400 and 1050

Click export, your file will be sent to the folder you set at the start.

Repeat the process for the second photo find the files in the folder you made (in my case 'export' on the desktop) and then email them to the [digitalsecretary@epscameraclub.co.uk](mailto:digitalsecretary@epscameraclub.co.uk) before the deadline. In the email please list clearly the title/s and which section each picture is to be entered in.

Good luck.
